EDUCATION

B.S. in Computer Science and Technology

Instituto Tecnológico de Estudios Superiores de Monterrey (2023) || Grade Average: 98

PROJECTS

Computer Security in Networks and Software - HTML, CSS, Tailwind, React, Vite, TypeScript, Figma Fall 2025

- Developed a web-based hospital management system for HIES (Sonora State Children's Hospital) cutting record access time by ~40% through user-centered form design and streamlined workflows.
- Contributed to interface design, front-end development, and usability testing by integrating intuitive forms, clear edit states, and reducing data entry errors.

Software Construction and Decision Making - HTML, CSS, React, Vite, TypeScript, Figma Spring 2025

- Developed an interactive web-based physics simulator aimed at enhancing user engagement and clarity.
- Contributed to interface design, front-end development, and usability testing, ensuring an accessible and visually cohesive user experience.

NASA Space Apps Challenge – HTML, CSS, Tailwind, React, Vite, TypeScript, Figma Fall 2025

- Developed a web application that provides real-time and historical weather data, combining information from the Meteomatics API and NASA scientific datasets.
- Contributed to front-end development and interface design by creating core user interface components for desktop and mobile, ensuring a consistent and user-friendly interface.

Internet Of Things - HTML, CSS, JavaScript, MySQL, PHP, Arduino Fall 2024

- Developed an IoT web dashboard for monitoring refrigerated container sensors. Focused on creating a clear, data-driven interface with secure login, responsive dashboards, and an accessible navigation sidebar.
- Contributed to interface design, prototyping, database integration, sensor testing, and full-stack development to ensure a seamless user experience.

Collaborative Role-Playing Game Development - Gamemaker, GML Fall 2024

- Developed a story-driven RPG created during Ludic Jam 2024, a two-week hackathon focused on creative game design. Featured original art, dialogue systems, and interactive gameplay.
- Contributed to visual design, interface and player experience design, narrative writing, and character animation, while supporting programming for movement and object interactions.

EXPERIENCE

Information Technology Specialist - Global Staffing Partners April 2025 - Present

- Provide technical support for Microsoft 365, Intune, and mobile device management (MDM), managing user configuration, license administration, security policies, and remote troubleshooting.

Lead Organizer - Ludic Jam (Hackathon) Fall 2025

- Planned and coordinated all event logistics and participant experience, designed visual branding (logo, posters, mascots), managed social media, handled catering and scheduling, and led a GameMaker course on game development for participants.

Instructor - Beautiful Patterns (STEM Empowerment Program) Summer 2025

- Delivered a week-long course empowering young women and non-binary people in STEM, teaching HTML and CSS fundamentals through hands-on projects that culminated in a personal web blog.

SKILLS

Technical Skills:

Programming: C++, Python, TypeScript, JavaScript, MySQL, PHP, R; Git, GitHub.

Web Development: HTML, CSS, React, Bootstrap, Tailwind, Vite.

UI/UX & Design: Figma, Canva, WordPress, Wix; Design Thinking, Wireframing, Prototyping, Usability Testing.

Game Development: Unity, Unreal Engine, GameMaker, Roblox Studio.

Languages:

Spanish (Native), English (C2 - Proficient).

ASSOCIATIONS

President, Girl Up: Student group that focuses on girl-centered leadership and equity for girls and women.

Attendee, Out 4 Undergrad Engineering 2025: Conference that brings together top engineering students and industry leaders for career development, networking, and mentorship.

Computer Science Representative, SEING: Student Society of Engineering.

Mentor, PEERS 2024-2025: Mentorship Program pairing upperclassmen with freshman students in college.
